

ELECTRONIC FLIGHT INSTRUMENT SYSTEM – EFIS

The EFIS is a valuable navigation tool and is part of the features of the Dragonfly DF1. Because of the many important safety features on the EFIS, including TCAS – Traffic Collision Avoidance System, it is included as standard equipment on the dragonfly.

It comes with 9 customizable pages that you can add, remove, change colors and fonts as you wish. Your custom layout is stored on a SD card with such information as airport data, heliports, GPS and more.
